

# SUNNYHEAT™ Infrared-Heating

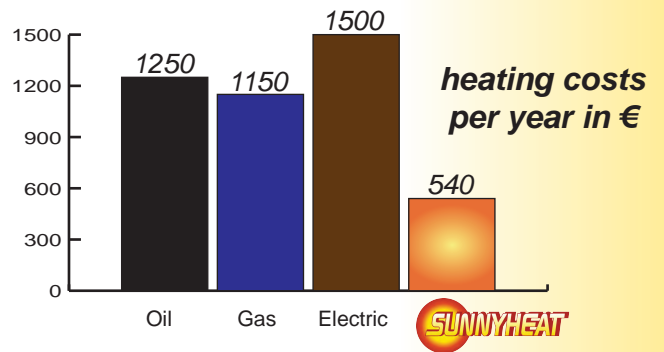

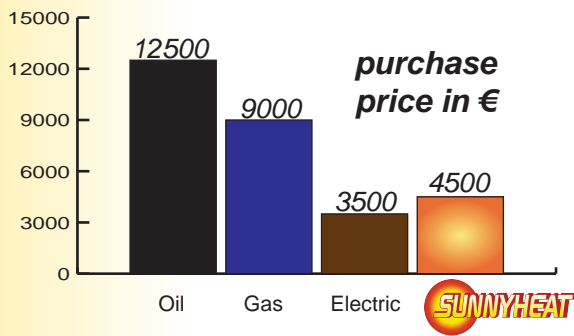

**HEATING RE-INVENTED!**

- Economical:** huge savings thanks to the IST - Intelligent Saving Thermostat
- Ecological:** No CO2 emissions
- Pleasant:** heats the body, not the air
- Easy Installation:** just plugs into a wall socket
- Decorative Designs:** Customizable to display photos or art in 8 Mpix JPEG format

Example of heating costs for a ~150 m<sup>2</sup> home in Belgium

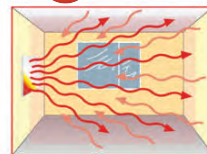

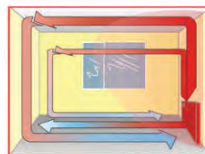

**Sun-effect:** High in the mountains during the winter, even at a temperature of -25°C, sunlight feels warm. It does not directly heat the air, but the matter and objects that it touches.

**The principle** is equivalent to an Austrian tile-stove - heated from the inside, and tiles on the outside radiate heat to the surrounding area.

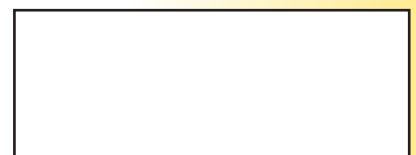

**3 standard panel sizes:**

- 60 cm x 60 cm for a room to 15m<sup>2</sup>
- 60 cm x 90 cm for a room to 20m<sup>2</sup>
- 60 cm x 120 cm for a room to 25m<sup>2</sup>
